

16 Port PCI Serial

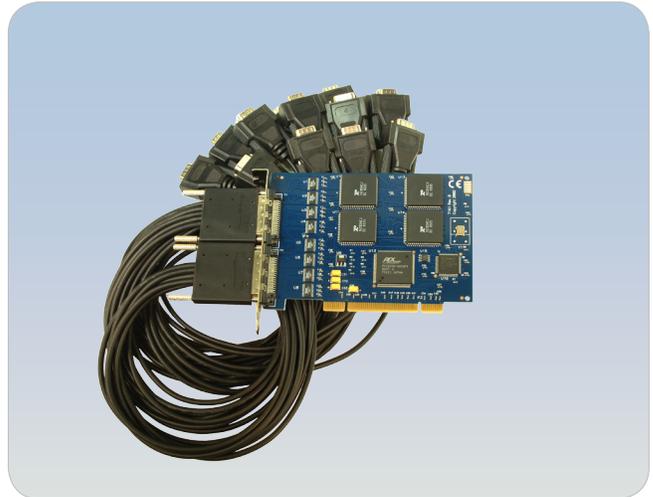

PCI RS-232 Serial Interface with DB-9M Cable

Item # 7161-DB9

The 7161-DB9 PCI serial interface provides sixteen RS-232 serial ports capable of data rates to 460.8K bps. Each RS-232 port implements all modem control signals for maximum compatibility with a wide range of peripherals. The 7161-DB9 is Universal Bus (3.3V and 5V) compatible and ships with two 36" cables that terminate to sixteen DB-9M connectors.

Unique Features

- ▶▶ 16C854 buffered UARTs with 128-byte FIFOs
- ▶▶ Data rates to 460.8K bps
- ▶▶ Universal Bus (3.3V and 5V) compatible
- ▶▶ All modem control signals implemented
- ▶▶ Two 36" cables terminate to sixteen DB-9M connectors

Technical Specifications

Number of ports	16
Communications chip	16C854
Max data rate	460.8K bps
Max data distance	Up to 50 ft.
Operating temperature	0 - +70° C
Storage temperature	-50 - +105° C
Humidity range	10 - 90% R.H.
